About Us

EZ Stain Solutions, LLC was founded in San Diego, CA. After becoming involved in 2009, owner Dean Hilbert brought his expertise in stains and dyes from his background in printing to the concrete staining arena. He noticed that concrete renovators were looking to match new and existing concrete, but there was no simple way to do so with the products on the market.

So, he began working with chemists to create the first water-based stain concentrate that could be diluted to match a desired color and actually worked. After much laboratory testing, the water-based nano-particulate formulation "EZ Stain" was born.

From the beginning, EZ Stain developed a list of ideals from our founder to require all products to be made in USA and thoughtfully sourced, manufactured, shipped and used. Our mission is "to provide the highest quality, most eco-friendly products that are easy to use and reasonably priced." And, the boss takes this very seriously!

All EZ Stain products are water-based or synthetic acid-based to create a safer environment for our customers. Advances in technology have improved synthetic acid abilities beyond those of traditional hazardous chemicals with no harmful side effects.

Cleaners

EZ Stain manufactures three types of non-toxic biodegradable cleaners:

1. ULTRA-SAFE CLEAN & ETCH
2. ARCHITECTURAL REVEAL ETCH & TOP CAST
3. ENCAPSULATING DEGREASER & PREP

What sets our concrete cleaners apart from any others we have seen are the chemicals they are made from and the results that are obtained using them. They are all 100% acid-free, not regulated by any government agency, and is approved by the USDA, FDA and carries a triple-zero HMIS score with the Department of Transportation.

Stains

EZ Stain manufactures 16 water-based stains ranging from bright yellows and blues to more traditional shades of brown and tan. All of these stains are made from the most eco-friendly substances and are manufactured using cutting edge technology and project-proven formulas. You will not find a higher quality stain that you can count on job after job. And, its EZ to use.

Sealers

EZ Stain offers one multi-purpose sealer. Depending upon the application method, virtually any surface can easily achieve a high-quality result. You can use this sealer indoors or outdoors on any concrete surface, block, pavers, brick, etc.

- High Quality
- Eco-Friendly
- Easy to Use

EZ STAIN™

ULTRA-SAFE CLEAN & ETCH

All EZ Stain Concrete Cleaners consist of non-toxic, zero volatile organic compounds (VOCs). We take great pride in the chemistry behind the creation of our products. They are the highest quality, safest products you will find.

Synthetic Acid

Effectively profile or etch a concrete substrate without any harmful effects and can be used safely for both interior and exterior applications. Non-fuming & won't hurt plants, landscaping, humans, pets or equipment.

High Quality

When used with our non-toxic stains and sealers, you can complete an entire concrete staining project without using dangerous acid-based products. Our goal is to provide high quality results that keep our customers coming back and eliminate unneeded negative effects on people, animals and the planet.

ACID-FREE
•
ECO-FRIENDLY

- Profile/Etch a Concrete Substrate
- Packaged as a Concentrate
- Dissolves Efflorescence and Salt Deposits
- More effective than Muriatic Acid

ENCAPSULATING DEGREASER & PREP

EZ Stain Concrete Cleaner/Degreaser is a non-toxic, zero volatile organic compounds (VOCs) that works by encapsulating hydro-carbons at the molecular level to release their bond instead of dissolving them. They can be rinsed clean with water, no need to neutralize. The concentrated formula allows you to adjust and dilute as needed to prep your job.

Synthetic Acid

Our safe and effective degreaser replaces acid and solvent-based cleaners with a product that doesn't cause any harmful effects. It cleans and preps interior & exterior applications. The non-fuming formula has no adverse effect on landscaping, humans, pets or equipment. 100% FDA and USDA compliant.

High Quality

Complete outstanding concrete staining projects using our degreaser. We source the highest quality domestic supplies for consistent, superb finishes.

ACID-FREE
•
ECO-FRIENDLY

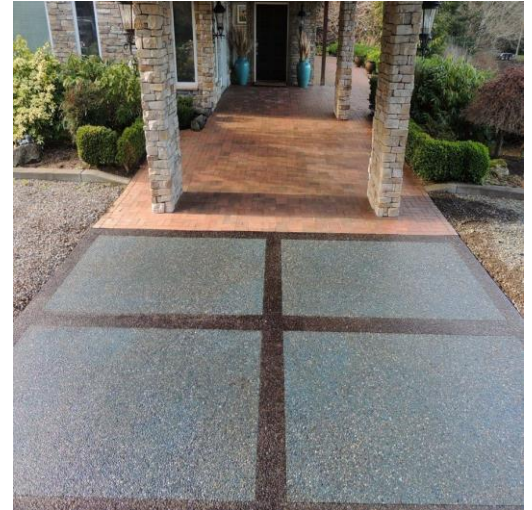

- Encapsulates to Lift the Toughest Oils
- Packaged as a Concentrate
- No Emulsification
- Biodegradable

ARCHITECTURAL REVEAL ETCH & TOP CAST

ACID-FREE

ECO-FRIENDLY

Our EZ Stain Concrete Architectural Reveal Etch & Top Cast solution is our strongest prep product. It is designed to remove/dissolve the top surface layer to create an exposed aggregate finish. This synthetic formula is stronger than muriatic acid, but is non-toxic and contains zero volatile organic compounds (VOCs). It does not release caustic fumes and can be used indoors as well as outdoors.

Synthetic Acid

Create architectural reveal on previously cured concrete with our strongest surface prep. Our advanced technology is 100% FDA & USDA compliant and has a Triple-Zero HMIS rating.

High Quality

When used with our non-toxic stains and sealers, you can complete a professional concrete staining project without using dangerous acid-based products.

- Creates Exposed Aggregate Finish
- Safe, Advanced Technology
- Stronger than Muriatic Acid
- Easy-to-Use

EZ STAIN™

WATER-BASED CONCRETE STAIN

Our concrete stain colors vary from bright to natural earth tones. Dilutions of black are commonly used to produce an array of greys. All EZ Stain products are water-based & can be used on concrete, block, wood and any other porous surface. Easy indoor/outdoor application.

Uses

When used with our cleaning and sealing system, the stains will permanently stain the desired surface. They can also be used to create marble and other sophisticated finishes through dilution and the use of multiple colors. Particularly on elegant interior and exterior finishes.

Features

EZ Stain Water-Based Concrete Stain concentrates are non-toxic, Zero VOC formulas with a Triple-Zero HMIS. It is very easy to apply, lasts long and can be tested, diluted, and recoated for differing end results.

WATER-BASED
•
NON-TOXIC

- Zero VOCs
- Triple Zero HMIS
- Water-Based Concentrate
- Many Colors to Choose From

ALL-PURPOSE CONCRETE SEALER

EZ Stain water-based sealer is a general purpose medium gloss acrylic sealer. It is non-yellowing and UV Stable. It protects concrete, block, stone, tile and masonry surfaces. It protects finishes against the adverse effects of engine oil, cooking grease, pet urine, etc. and enhances the color below. Indoor/outdoor safe and extremely easy to apply and maintain.

Uses

Protects and improves appearances of stained, stamped and decorative concrete or other surfaces.

Features

EZ Stain All-Purpose Concrete Sealer repels oil and grease stains and reduces efflorescence. It is a breathable medium gloss coating that cleans up with water. It is very easy to apply, lasts long and can be recoated. Triple-Zero HMIS score and qualifies for LEED points.

WATER-BASED

•
UV STABLE

- Water-Based Acrylic
- Non-Yellowing & UV Stable
- Low VOC LEED Compliant
- Medium Gloss
