Cleaners

EZ Stain manufactures three types of non-toxic biodegradable cleaners:

1. ULTRA-SAFE CLEAN & ETCH
2. ARCHITECTURAL REVEAL ETCH & TOP CAST
3. ENCAPSULATING DEGREASER & PREP

What sets our concrete cleaners apart from any others we have seen are the chemicals they are made from and the results that are obtained using them. They are all 100% acid-free.

The Ultra-Safe Clean & Etch is a powerful cleaner that has the power to remove efflorescence and lime, but is safe enough to use indoors if desired. The Architectural Reveal is a dissolver that is designed to completely remove the top surface of concrete when used undiluted and will leave the exposed aggregate to shine under the stain. The Encapsulating Degreaser lifts tough petroleum based oils from driveways and cleans all types of concrete. No emulsification since encapsulation occurs at a molecular level.

About Us

EZ Stain Solutions, LLC was founded in 2009 in San Diego, CA. After years of working on concrete projects, our founder Dean Hilbert noticed that many of his customers were looking to match new and existing concrete. The problem was that there was no simple way to do so with the products on the market.

So, he began working with chemists to create stains that could be made in a concentrate and then diluted to the desired color as a perfect match. By 2009, after seemingly endless amounts of testing in the laboratory, the nano-particulate was final and EZ Stain was born.

From the beginning, EZ Stain developed a list of ideals and our founder required all products to be thoughtfully sourced, manufactured, shipped and used. Our mission is "to provide the highest quality, eco-friendliest products that are easy to use and reasonably priced." And, the boss takes this very seriously!

All EZ Stain products are water- or synthetic acid-based because they are much safer for the environment and our customers. Advances in technology have increased the abilities of synthetic acids to go beyond what traditional hazardous chemicals could do. Our vision would not be possible without your support, thank you!

Stains

EZ Stain manufactures 16 water-based stains ranging from bright yellows and blues to more traditional shades of brown and tan. All of these stains are made from bio-degradable substances that are manufactured using cutting edge technology and project-proven formulas. You will not find a higher quality stain that you can count on year over year. And, its EZ to use.

Sealers

EZ Stain manufactures only one concrete sealer. The reason for this is that depending upon the application method used, it can achieve virtually any commonly requested outcome. You can use this sealer indoors or outdoors on virtually any concrete surface, brick, stone or tile.

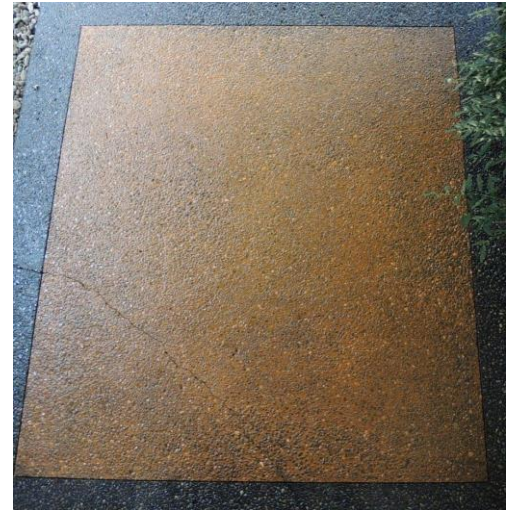

EZ STAIN™

ULTRA-SAFE CLEAN & ETCH

ACID-FREE

•
CONCENTRATE

All EZ Stain Concrete Cleaners consist of non-toxic, zero volatile organic compounds (VOCs). We take great pride in the chemistry behind the creation of our products and are happy to share that they are the highest quality, safest products you will find.

Synthetic Acid

Effectively profile or etch a concrete substrate without any harmful effects and can be used safely for both interior and exterior applications. Non-fuming & won't hurt plants, landscaping, humans, pets or equipment.

High Quality

When used with our non-toxic stains and sealers, you can complete an entire concrete staining project without using dangerous acid-based products. Our goal is to provide high quality results that keep our customers coming back and eliminate unneeded negative effects on people, animals and the planet.

- Profile/Etch a Concrete Substrate
- Packaged as a Concentrate
- Stronger than Muriatic Acid

ENCAPSULATING DEGREASER & PREP

All EZ Stain Concrete Cleaners consist of non-toxic, zero volatile organic compounds (VOCs). We take great pride in the chemistry behind the creation of our products and are happy to share that they are the highest quality, safest products you will find.

Synthetic Acid

Safe and effective degreaser that replaces acid and solvent-based cleaners without any harmful effects. Can be used safely to clean and prep for both interior and exterior applications. Non-fuming & won't hurt plants, landscaping, humans, pets or equipment.

High Quality

When used with our non-toxic stains and sealers, you can complete an entire concrete staining project without using dangerous acid-based products. Our goal is to provide high quality results that keep our customers coming back and eliminate unneeded negative effects on people, animals and the planet.

EZ STAIN™

WATER-BASED CONCRETE STAIN

EZ Stain's concrete stains come in a variety of colors from bright blue or yellow, to traditional brown and grey. They are all water-based stains for concrete, tile, masonry and even wood surfaces. They can be applied both indoors & outdoors and are extremely easy to apply.

Uses

Our stains are very high quality and permanently stain all concrete, brick, natural and manufactured stone, stucco, slate and unglazed tile surfaces. They are also used to create marble and other finishes by using multiple colors. Particularly on elegant interior finishes.

Features

EZ Stain Water-Based Concrete Stain concentrates are non-toxic, Zero VOC formulas with a Triple Zero HMIS. It is very easy to apply, lasts long and can be tested, diluted, and recoated for differing end results. Completely biodegradable formula that has been lab tested for the highest quality results and no negative impacts on the environment.

WATER-BASED
•
NON-TOXIC

- Zero VOCs
- Triple Zero HMIS
- Water-Based Concentrate
- Many Colors to Choose From

ALL-PURPOSE CONCRETE SEALER

EZ Stain's sealer is a non-yellowing, clear water-based acrylic that protects concrete, tile and masonry surfaces. Enhances finish and deters cooking oil & grease both indoors & outdoors and are extremely easy to apply and maintain.

Uses

Our sealer creates water seals, protects and improves appearance of stamped and exposed aggregate concrete, brick, natural and manufactured stone, stucco, slate and unglazed tile. It is also used as a base for interior finishes and polishes. Sealing concrete and masonry surfaces prior to painting or applying over painted or color stain surfaces can be done indoors or outdoors.

Features

EZ Stain All-Purpose Concrete Sealer repels oil and grease stains and reduces efflorescence. It is a breathable medium gloss coating that cleans up with water. It is very easy to apply, lasts long and can be recoated. And, it qualifies for LEED points.

WATER-BASED

•
UV STABLE

- Water-Based Acrylic
- Non-Yellowing & UV Stable
- Low VOC LEED Compliant
- Medium Gloss
